

Canvas with Urkund Instructor View

Guide for Instructors

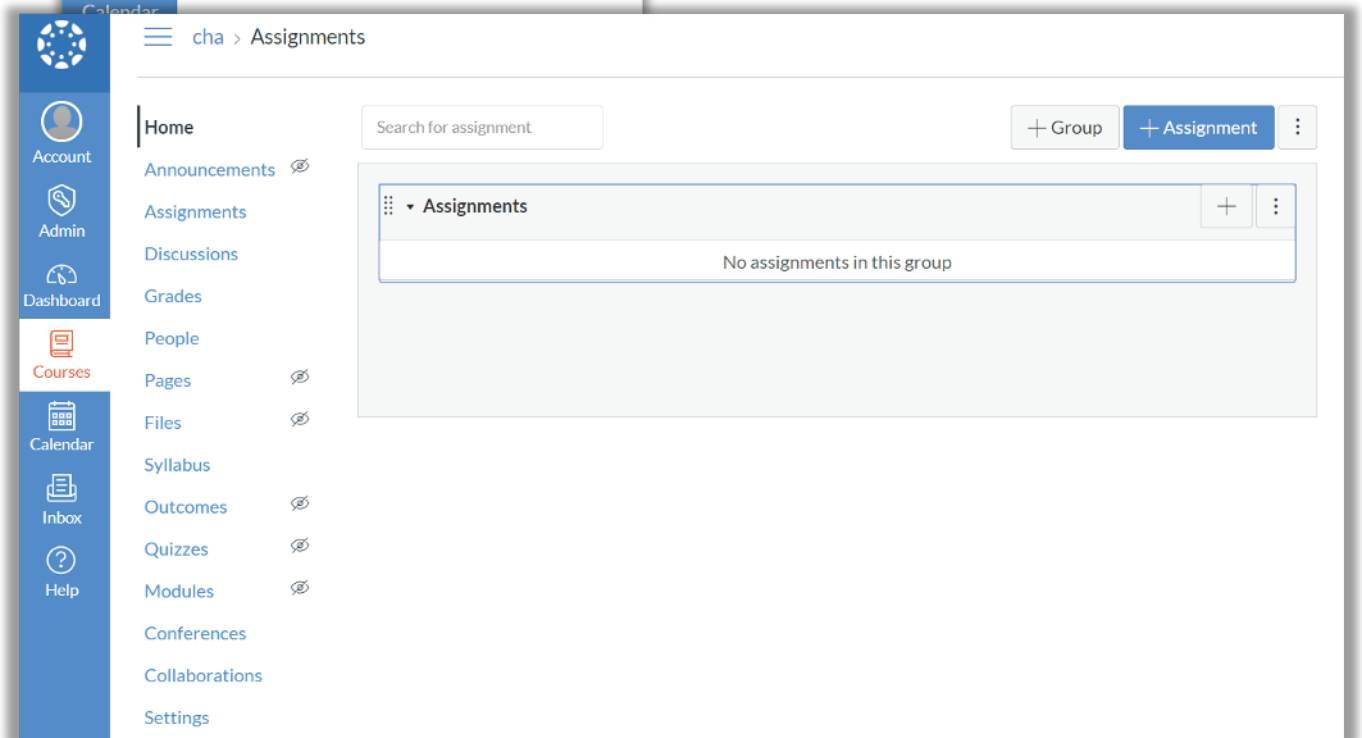

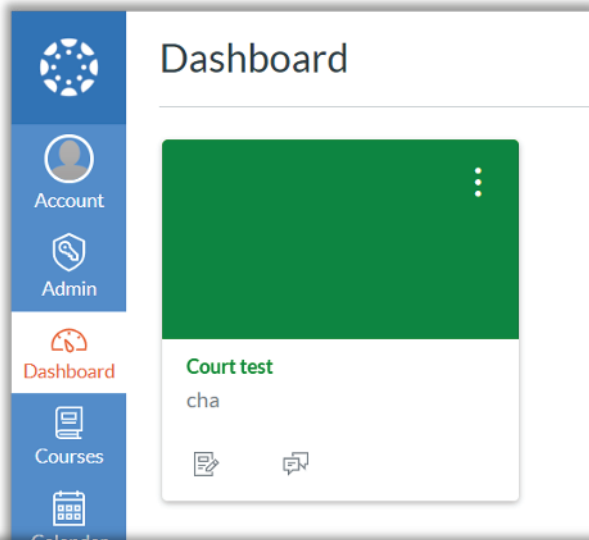

About Urkund LTI Integration with Canvas

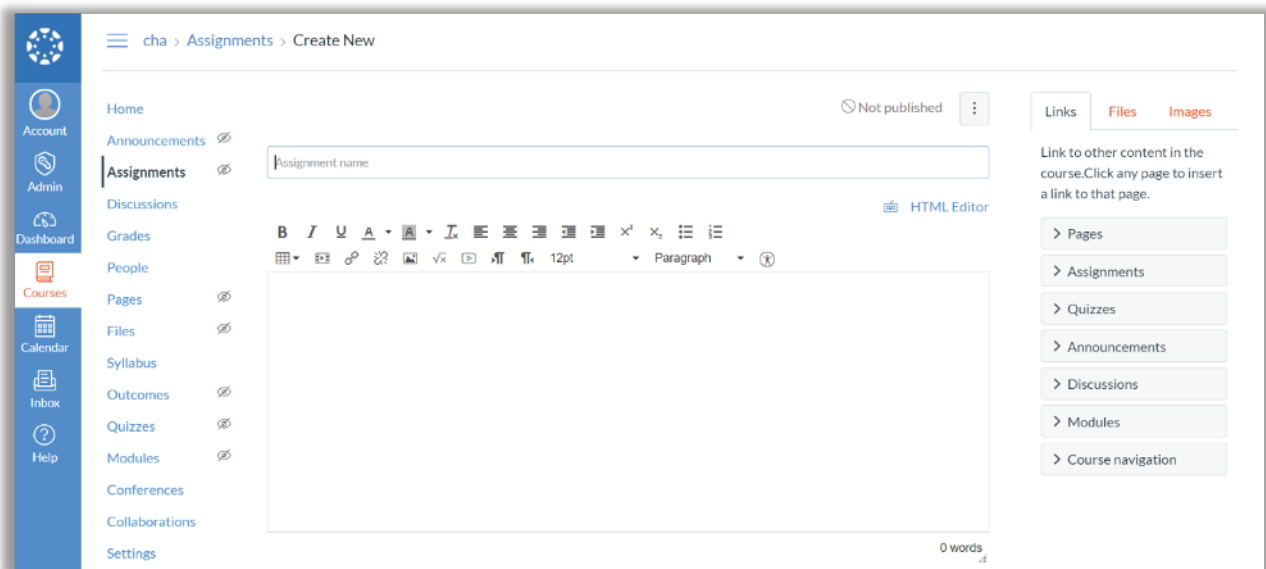

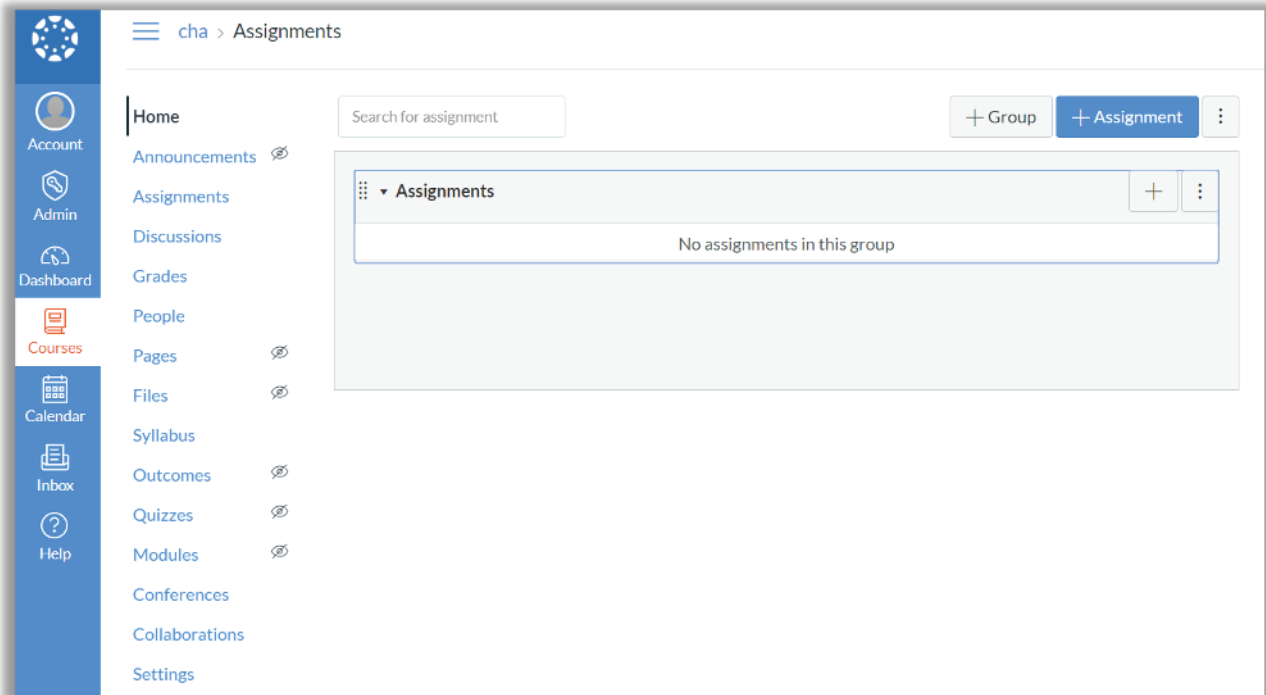

Urkund can be added to an institutional LMS through an LTI tool integration. The integration allows the institution Admin User(s) access to the Urkund tool features through their LMS without having to make changes to the LMS properties. Canvas institution Admin User(s) can add the Urkund tool to their Canvas instance, making it available to instructors as a preconfigured tool for their courses.

Assignment Creation Instructions

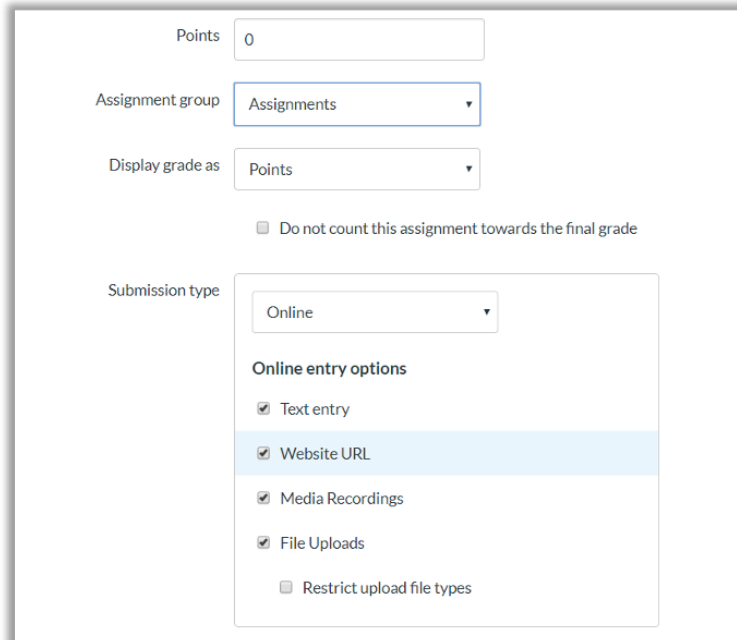

In your Course, select 'Assignments'.

In Assignments, select '+ Assignment' and a new screen will appear to create your assignment. Complete the assignment as you normally would with an Assignment Name etc. until you reach the 'Submission Type' box.

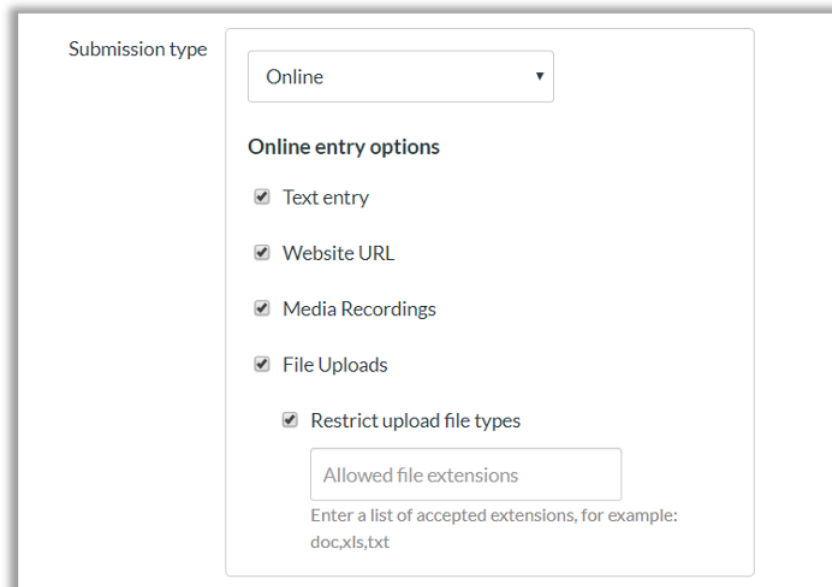

In this box, be sure to select 'Online' for submission type and select the 'Entry Options'.

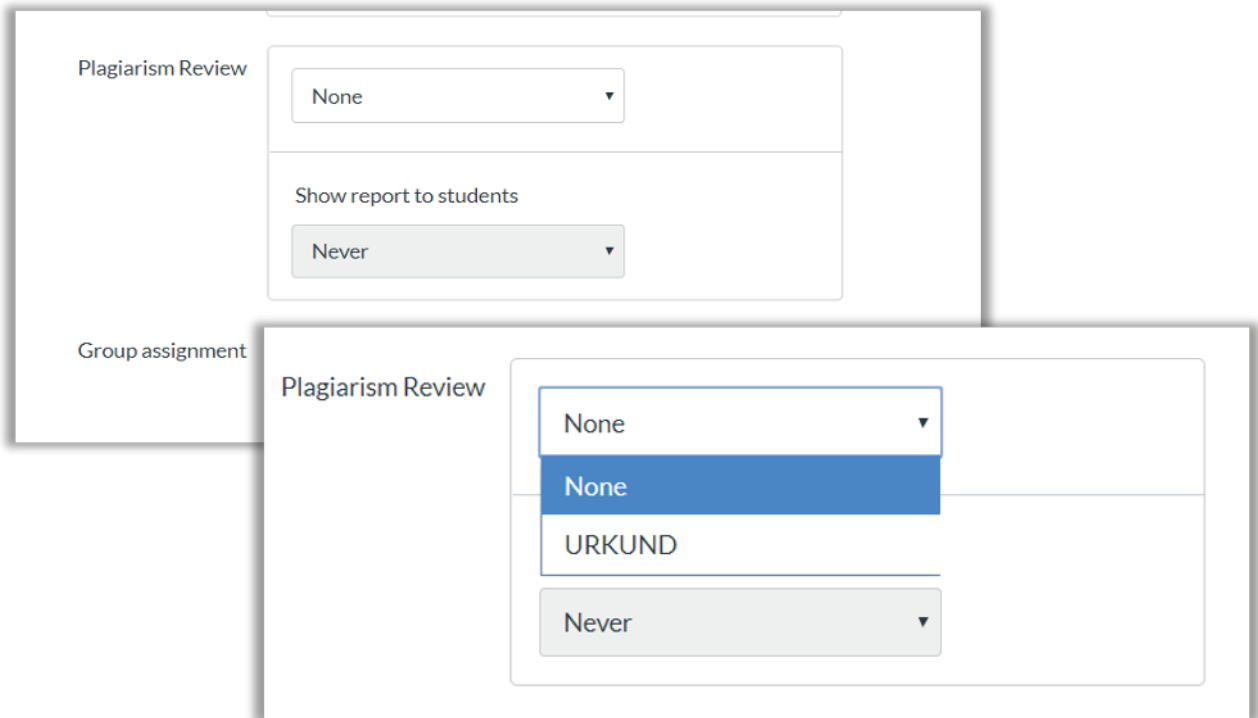

The screenshot shows the 'Submission type' section of a Moodle assignment configuration. The 'Submission type' dropdown is set to 'Online'. Below it, the 'Online entry options' section is expanded, showing several checked options: 'Text entry', 'Website URL', 'Media Recordings', and 'File Uploads'. The 'Restrict upload file types' option is unchecked. The 'Do not count this assignment towards the final grade' checkbox is also unchecked. Other visible settings include 'Points' set to 0, 'Assignment group' set to 'Assignments', and 'Display grade as' set to 'Points'.

OPTIONAL: You can select 'Restrict Upload File Types' and include the file types to what you and your students normally use and that URKUND will support – .doc, .docx, .sxw, .ppt, .pdf, .txt, .rtf, .html, .htm, .wps, .odt, and .pages (up to version four).

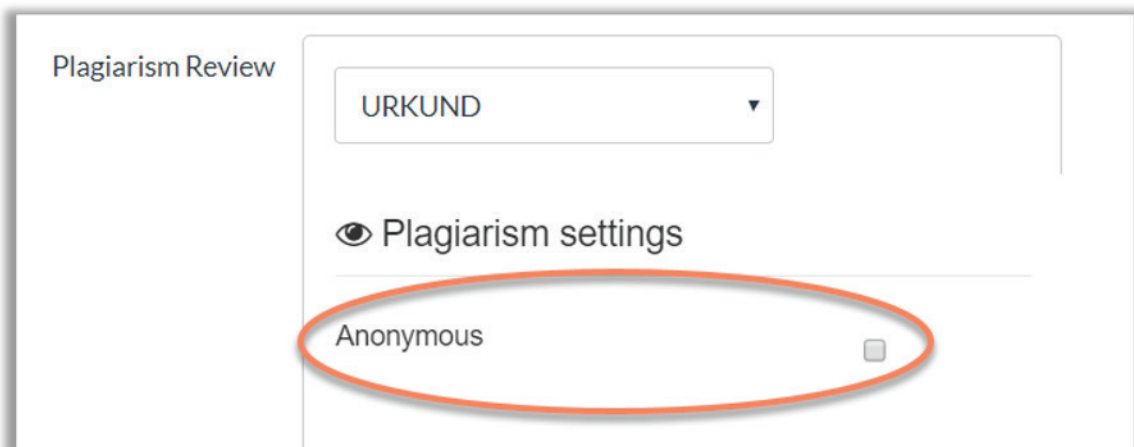

This screenshot shows the 'Restrict upload file types' option selected in the 'Online entry options' section. Below this option is a text input field labeled 'Allowed file extensions' with the placeholder text 'Enter a list of accepted extensions, for example: doc,xls,txt'. The other 'Online entry options' (Text entry, Website URL, Media Recordings, File Uploads) remain checked.

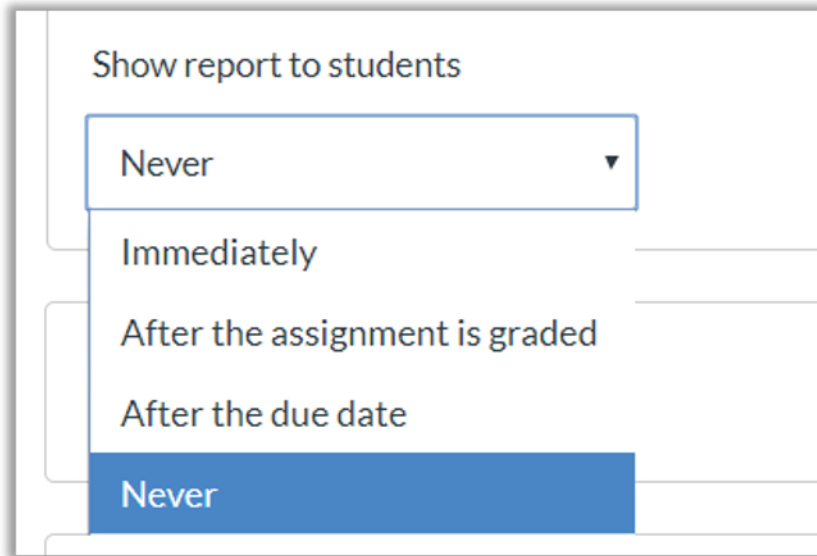

The next box is the 'Plagiarism Review' box. Here you will select 'URKUND' from the drop-down menu.

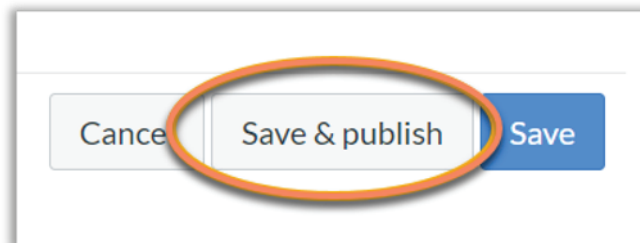

OPTIONAL: The 'Anonymous' feature is an additional layer of privacy afforded to students that allows for their submission to be completely anonymous should it flag as similar to another student's submission.

Still under the Plagiarism Review box, select when or if you want your students to see the Urkund Similarity Report. Then select 'Save & Publish'.

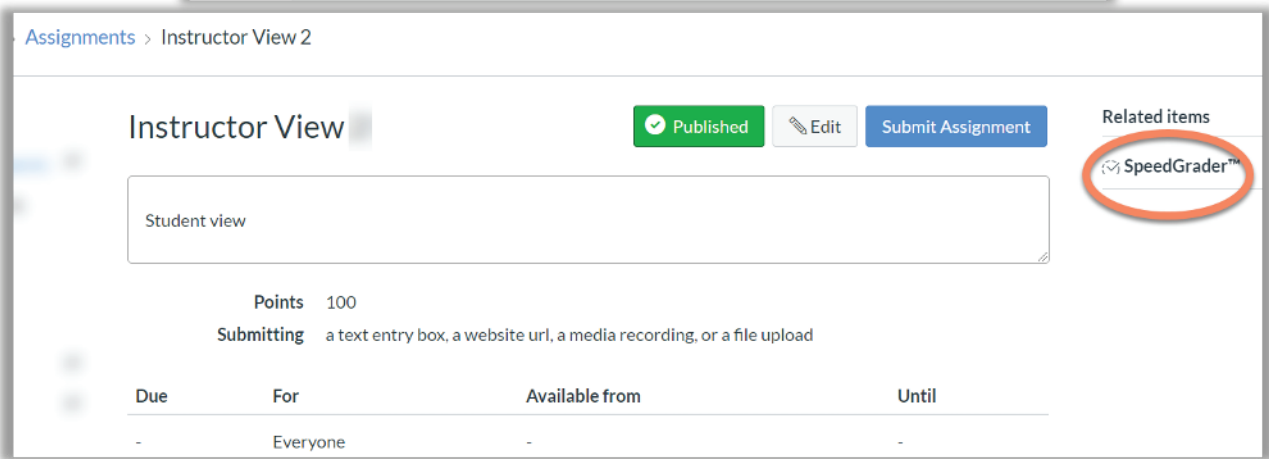

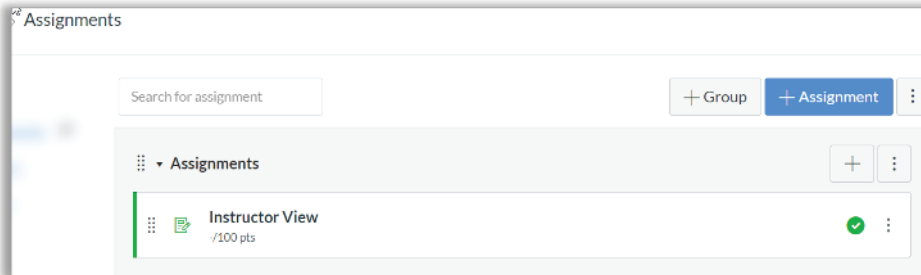

The screenshot shows a dropdown menu titled "Show report to students". The menu is open, displaying four options: "Never", "Immediately", "After the assignment is graded", and "After the due date". The "Never" option at the bottom is highlighted with a blue background, indicating it is the selected option.

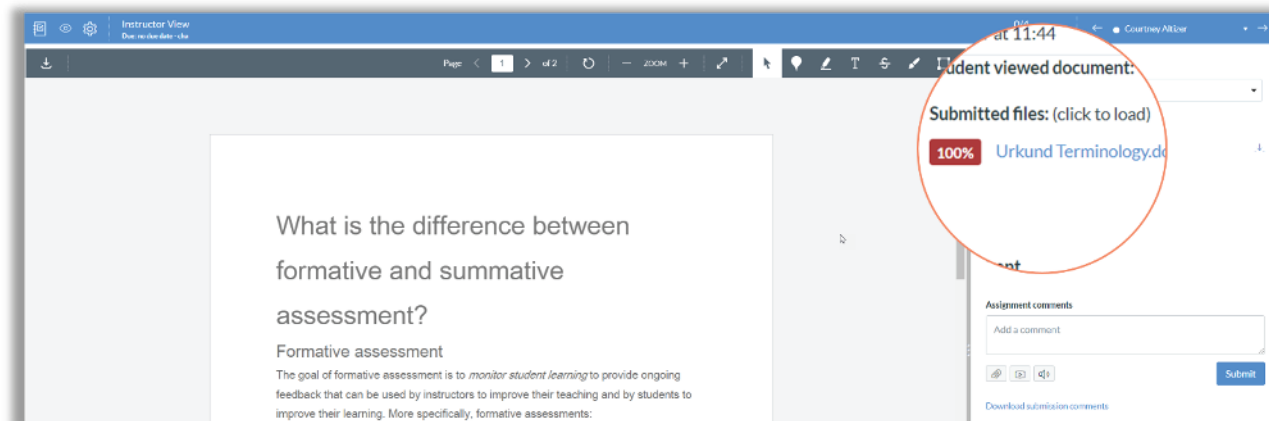

The screenshot shows a row of three buttons: "Cancel", "Save & publish", and "Save". The "Save & publish" button is highlighted with an orange circle, indicating it is the button to be clicked.

View Results

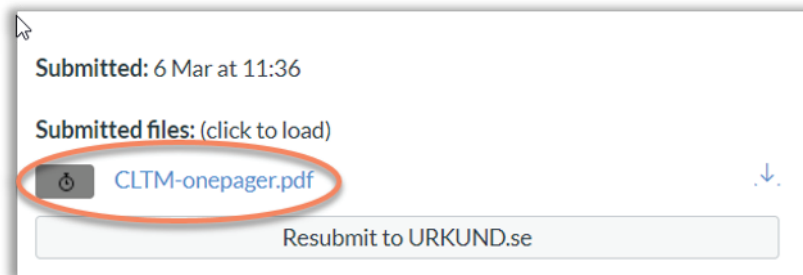

In Canvas SpeedGrader – Go into your Assignments and open the desired assignment.

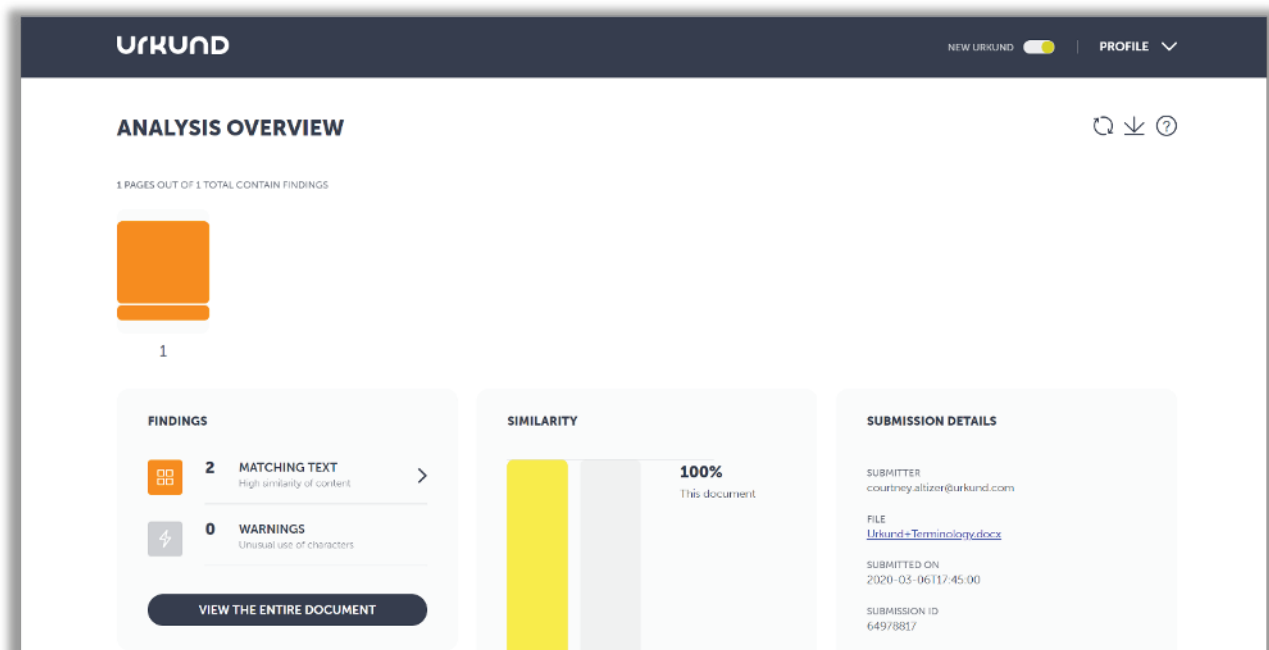

The SpeedGrader window will appear displaying the document submitted by the student and the Similarity Score (A red tag with a percentage - located in the right-hand column).

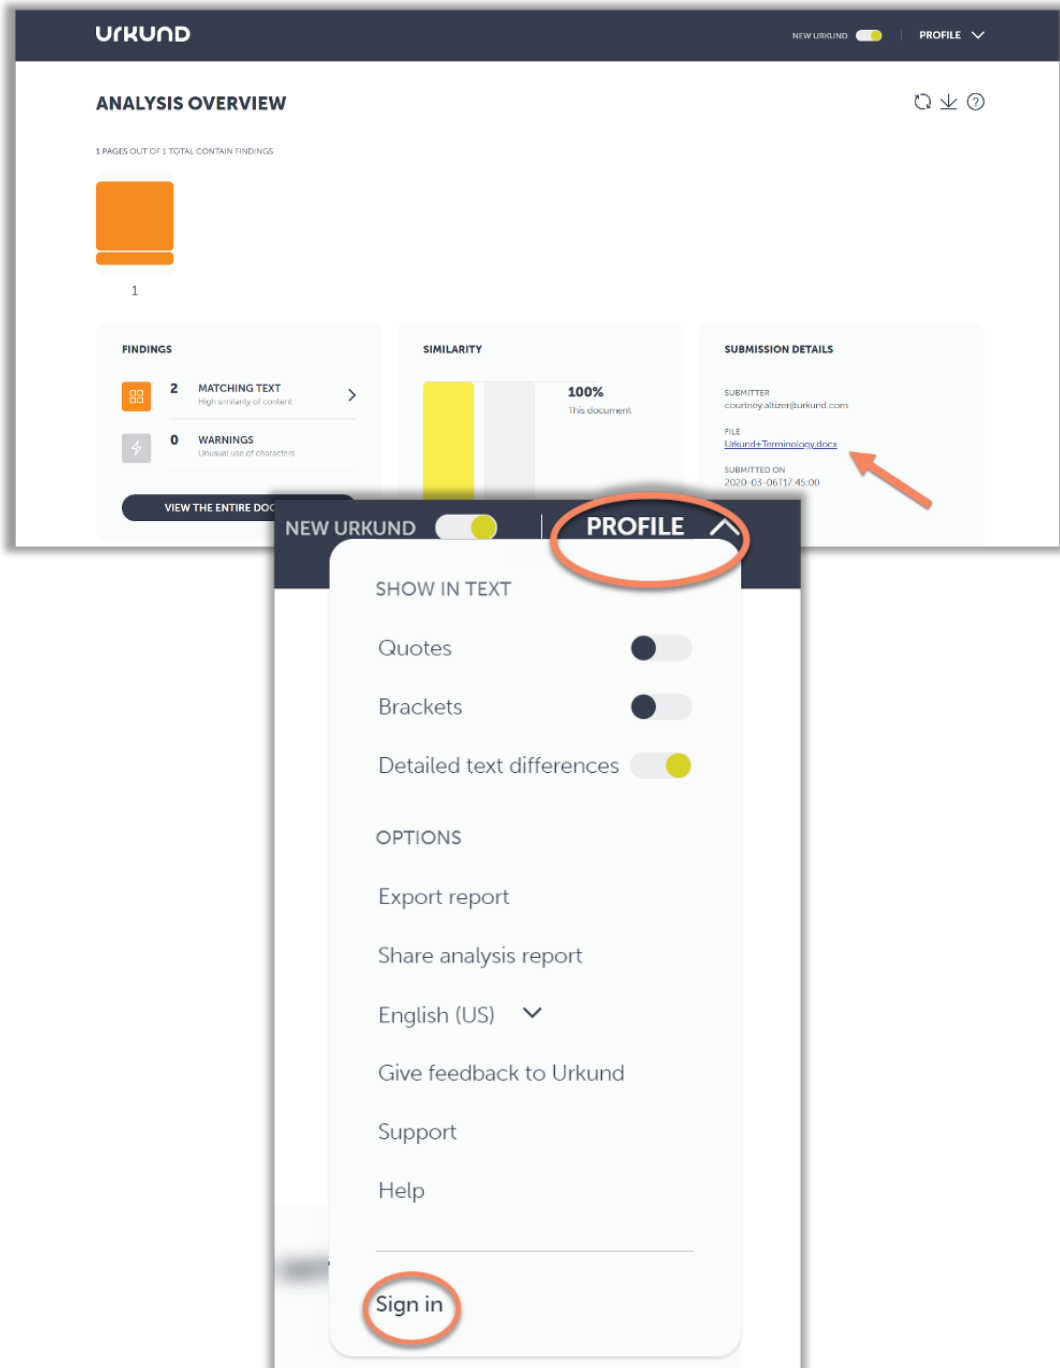

NOTE: Sometimes the Similarity Score does not appear right away. When this is the case, you will see a watch clock icon that means the report is pending. This can sometimes take up to 7-8 minutes. You will need to refresh your screen to see when the Similarity Score has changed.

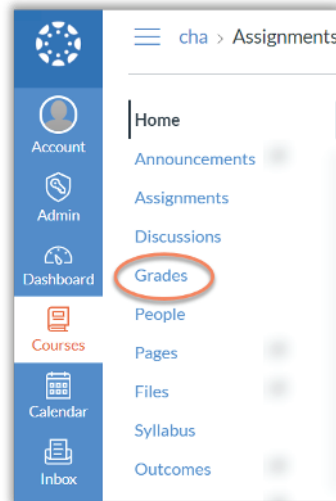

Select the red tag Similarity Report. A new window will open to view the Urkund Similarity Report.

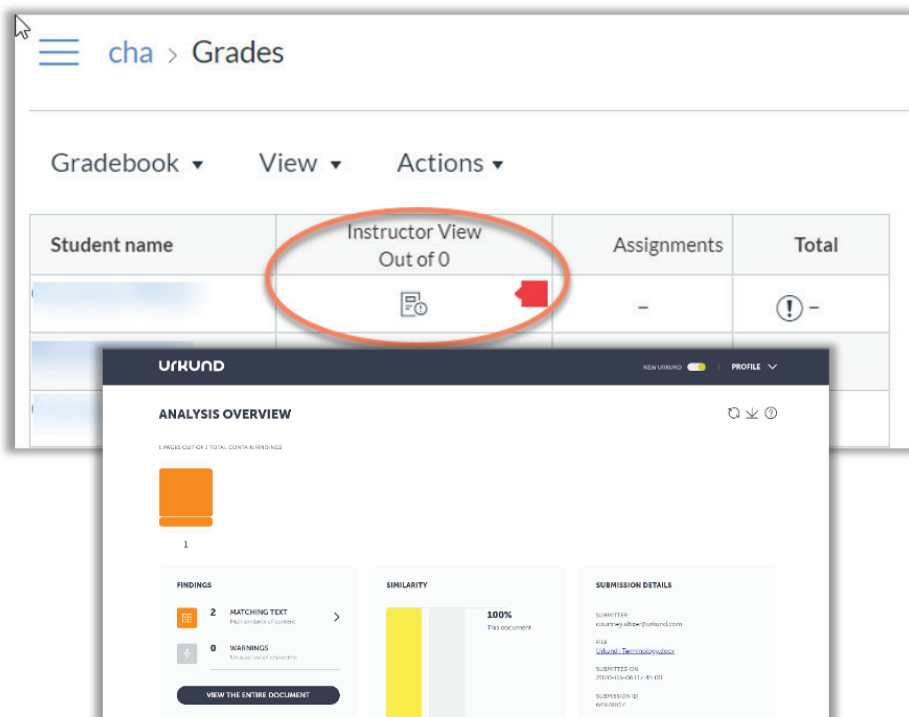

If you want to view the document that was submitted (visible as a highlighted hyperlink), you will have to sign-in under Profile using your Urkund credentials.

In Canvas Grades, select your Course and the desired Assignment.

Your gradebook will appear. The column under the Assignment Title you gave it will show when a document has been submitted for each student – and red label. The red label indicated that the submission has generated an Urkund Similarity Report. Select the red label to view more details and access the report as you did in SpeedGrader.

About Urkund

Urkund supports academic institutions, secondary schools, and corporations in their institutional efficiency and effort to safeguard original thinking. We deliver a fully automated system for checking text originality and preventing plagiarism. The software can be integrated into all major learning management systems and uses advanced machine learning to deliver test-winning accuracy. With 20 years at the forefront of promoting academic integrity, Urkund now serves over 5,000 institutions in nearly 80 countries worldwide. Urkund is privately owned and headquartered in Stockholm, Sweden.
